

ELECTRICAL OWNER SIGNATURE FORM

As the owner of the residential property located at _____

in the Village of Northfield, I desire to do my own simple branch circuit addition to my electrical system. I do have the knowledge to understand the requirements of the Electrical Code and its additional amendments. All work will be done in strict compliance with the Code.

If the present electrical service is not adequate to serve the additional load, I agree to employ a registered electrical contractor to increase the service to meet Village Code requirements and make new application for permit for such revision.
